Dear Mr. Mssalak,

We hereby declare that all the RSS sensors (RSS 16, RSS 36, RSS 260) are similar in working principal and function.

All sensors use the same RFID technology, also using the same frequency, and are intended for detection purposes.

The only difference between the devices is the construction size, the actuating distances for each Device, and the size of the coils for the RFIDs due to the different actuating distances.

Mit freundlichen Grüßen

K.A. Schmersal GmbH & Co. KG

i. A. Michael Weiss
